

2D & 3D FIND IT!

For this game you will need:

Game board

1 die

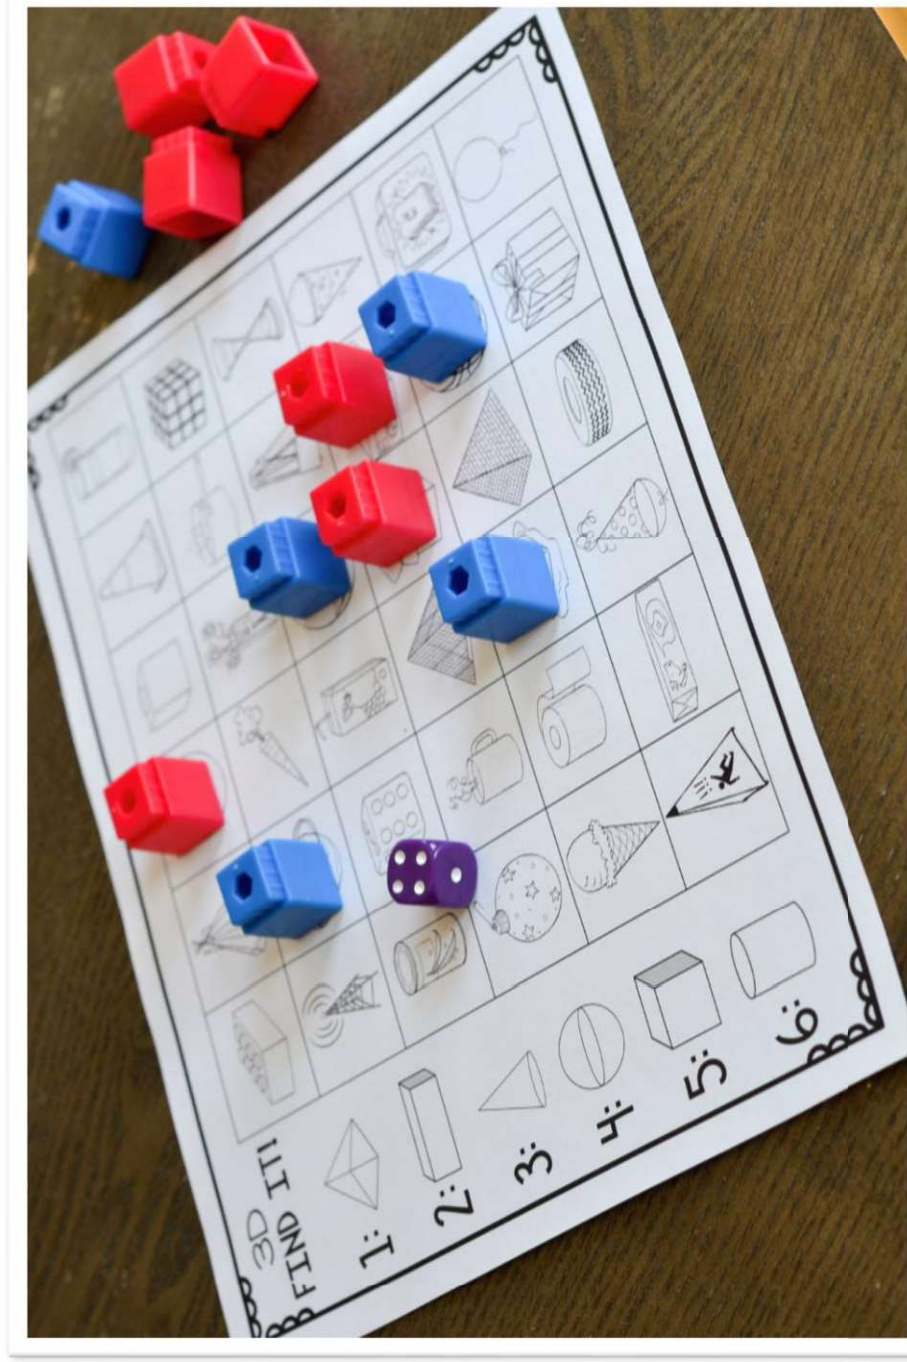

2 crayons (one for each player)

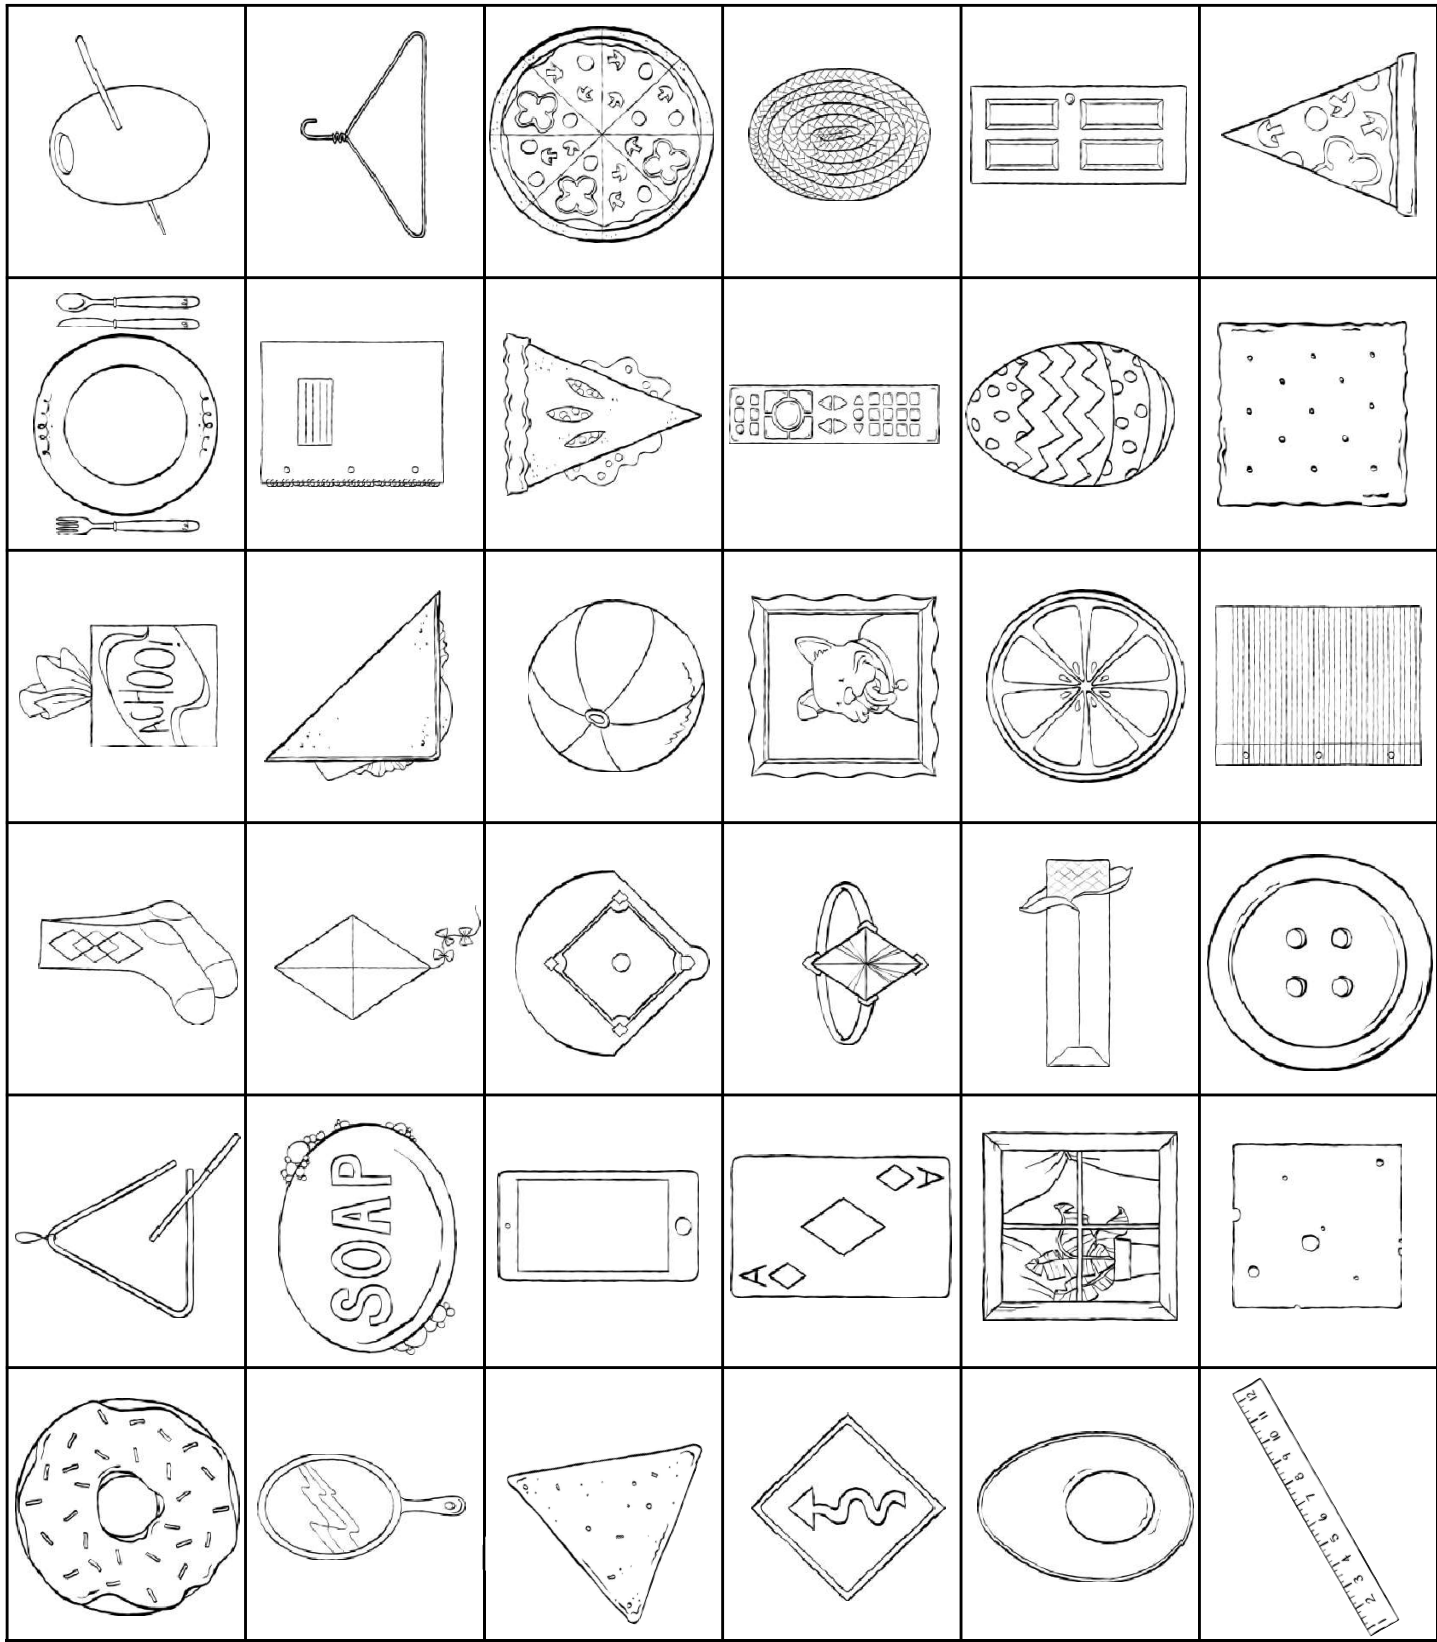

Directions:

Students will roll a die and look for a shape on the board that has one MORE or one LESS side than that number. They will color that piece of the game board in.

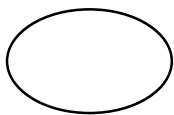

For instance, if I roll a 4 I could cover a shape with 3 sides OR a shape with 5 sides! Students continue rolling and covering until all the spaces are filled in. Whoever has the most colored in, wins!

If there is not a space to color, your turn is skipped!
