

# RACE TO ROBOT

For this game you will need:

Robot sheet

Spinner

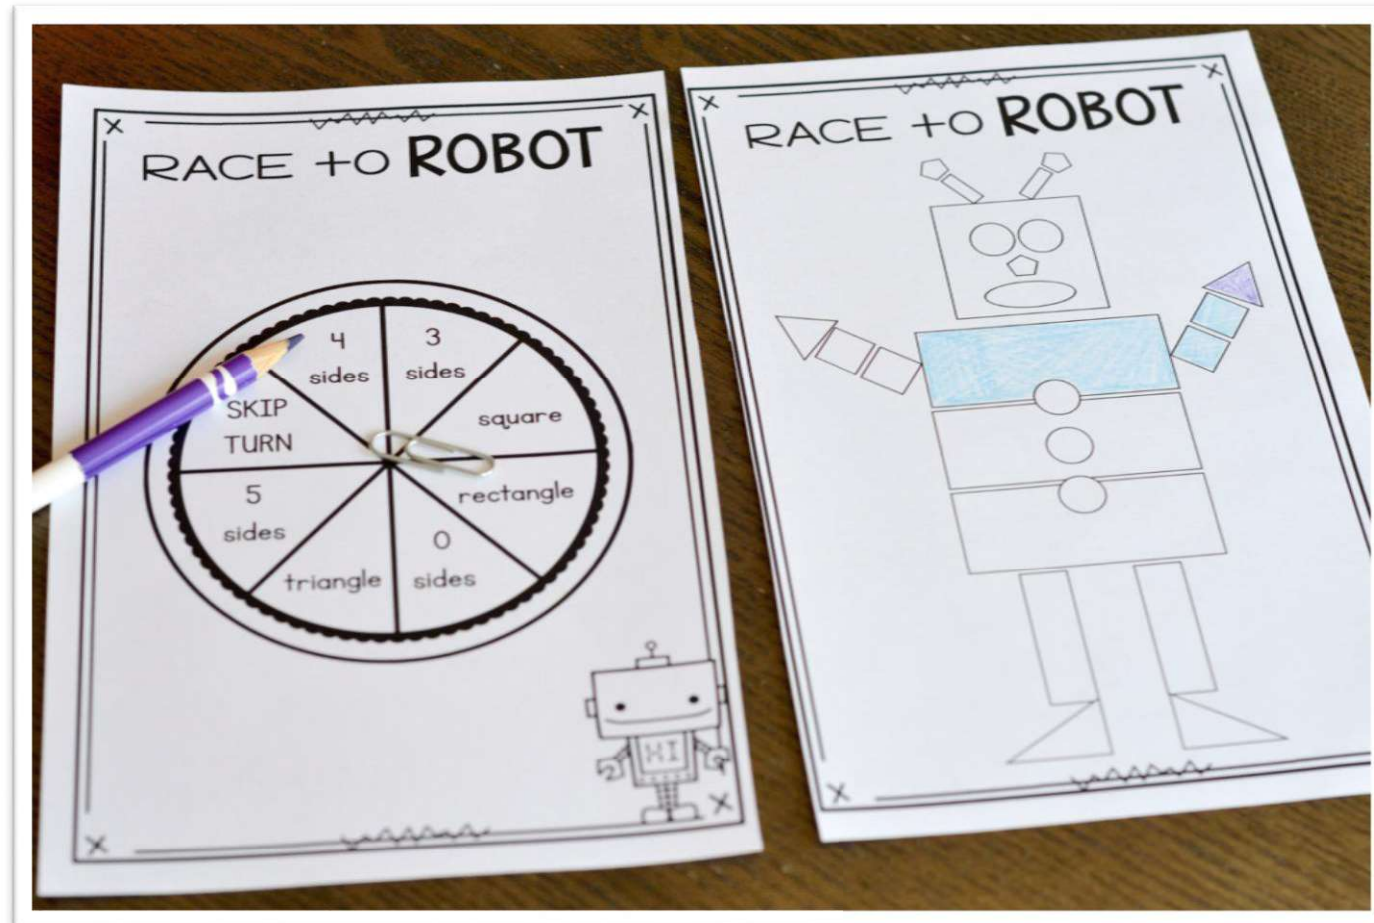

Paperclip and pencil  
crayons

Directions:

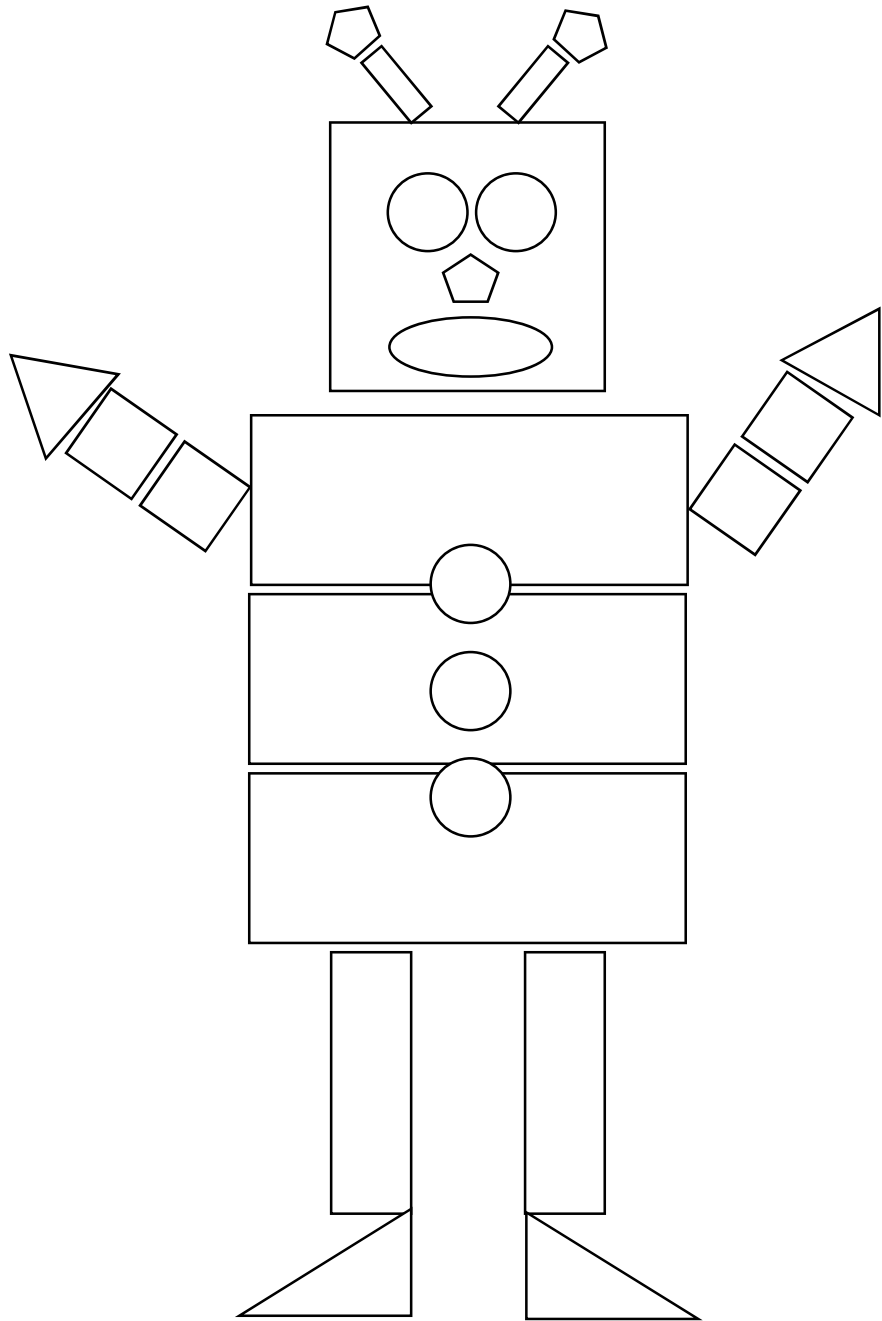

Students each get their own robot sheet and spinner. Students will take turns spinning the spinner with a pencil and paperclip.

They will land on a shape name or characteristic and find one of those shapes on their robot sheet to color in. Students will continue to spin and color until one student colors the whole robot first!

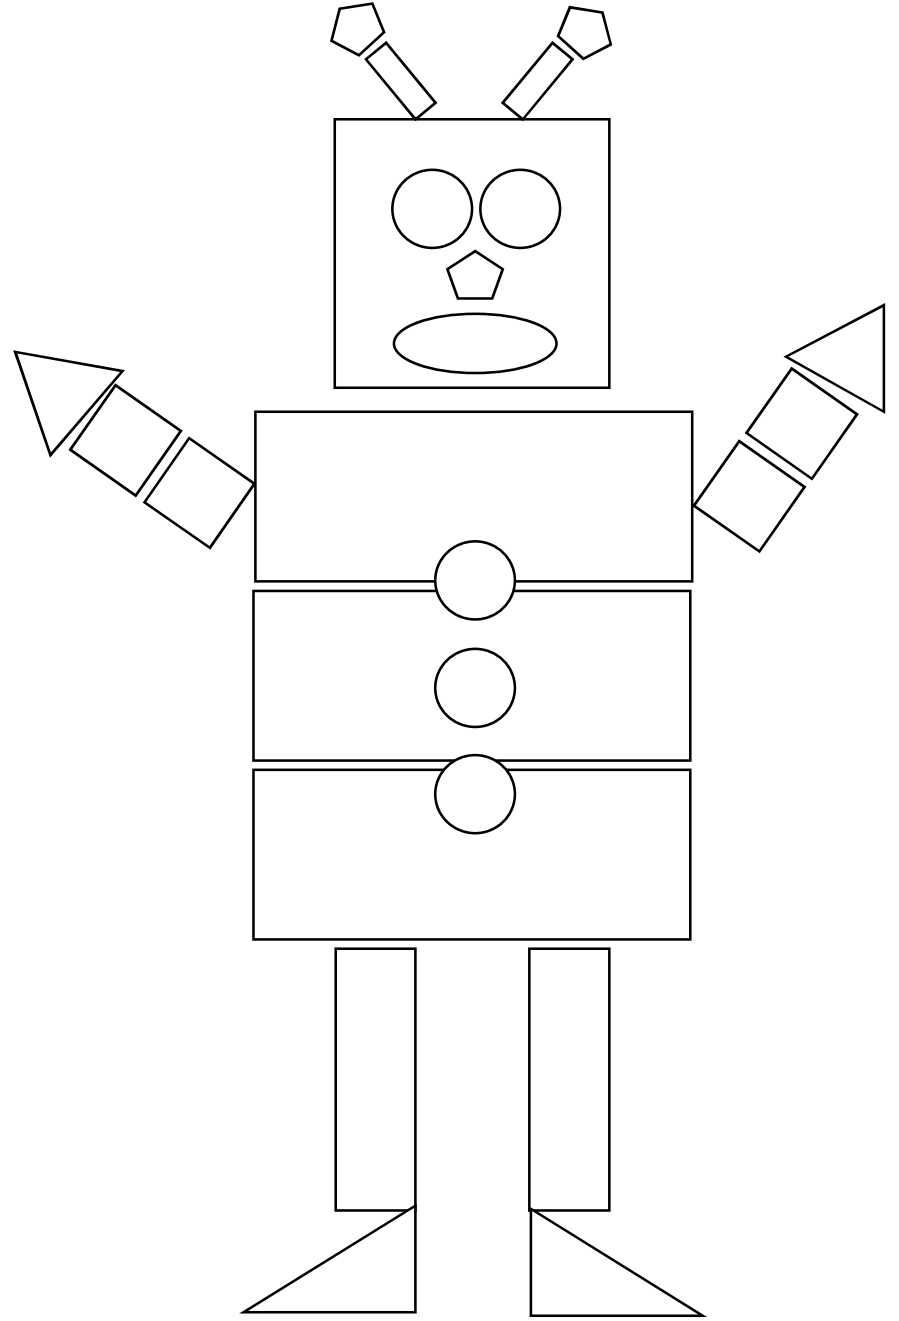

There is also a skip turn portion on the spinner to make the game a little more interesting!
