

MATCH THE SHAPE

For this game you will need:

Game Board

Spinner

Paperclip and pencil

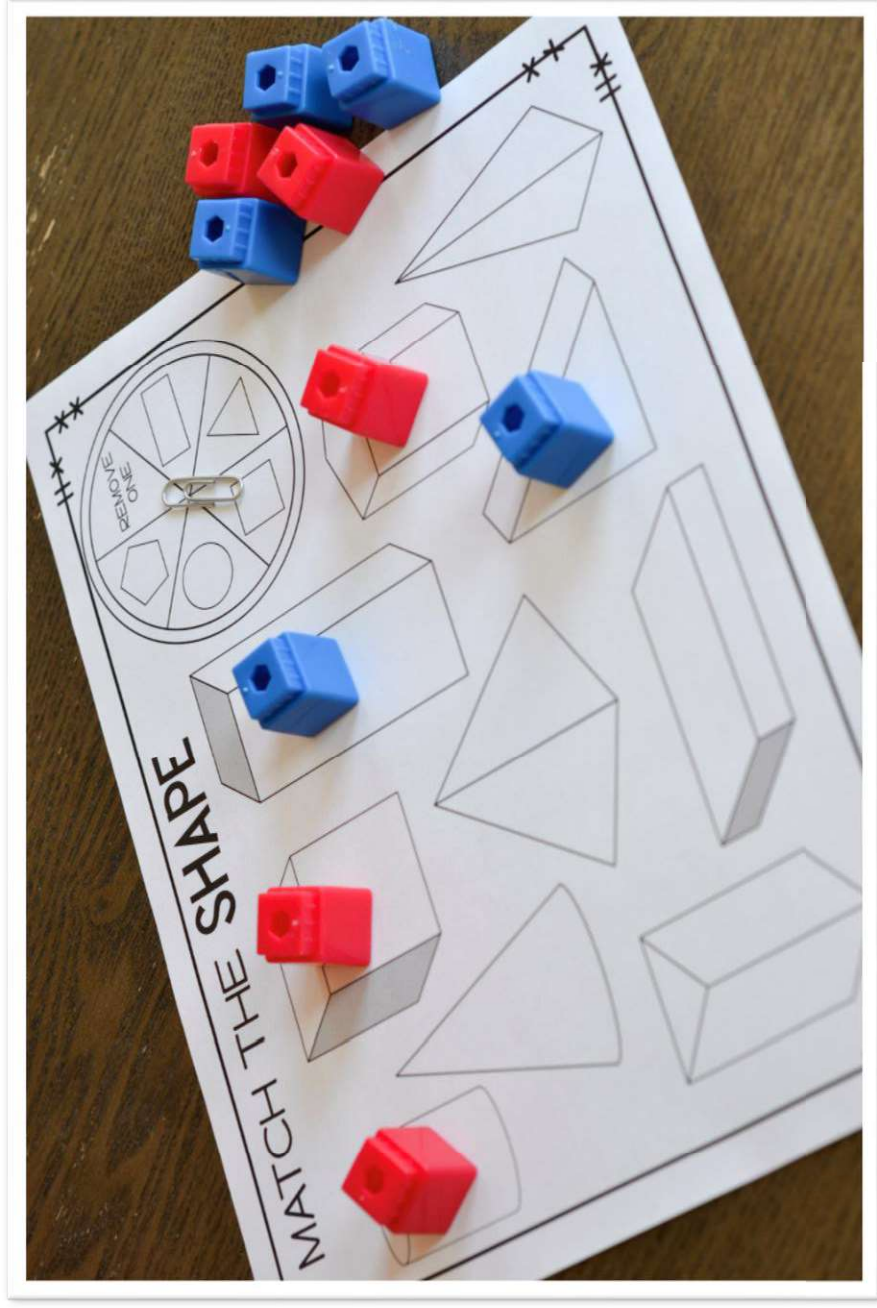

Cubes (different colors for each student)

Directions:

Students will spin the spinner and land on a 2D shape. They will look for the 3D shape with a matching face. When they find the matching shape, they will cover it with their color cube.

If a student lands on the remove one wedge, they will remove an opponent's cube. Students will play until all the 3d shapes are covered. Whoever has the most wins!

While my students are playing this game, I usually have the 3D shapes out on the table for them to examine the faces.
